

Approved Aircraft Wash

DESCRIPTION

Skybrite is formulated specifically to remove greasy, carbon-based soils, including "Skydrol" residues, from aircraft surfaces. **Skybrite** is an approved water-based cleaner that contains no petroleum solvents or thinners that would violate Rule 66 Codes or sewer discharge standards.

DIRECTIONS

Skybrite is best used at 6.5 to 25.5 oz per gallon of water (50 to 200 ml/litre) (1:20 to 1:4), either by low pressure spray or foam-on application. For best results, apply **Skybrite** solutions uniformly to the aircraft surface and allow 5 to 15 minutes contact time before rinsing. Heavy oil or grease deposits may need additional scrubbing and/or a stronger concentration of product.
