

STONE CLAD

Stone Surface Coating

DESCRIPTION

Stone Clad is a special, water-based sealer/finish designed for use on non-resilient surfaces such as marble, granite, slate, quarry tile, terra cotta, concrete, ceramic tile and brick.

Stone Clad's a tough finish, formulated to protect and beautify natural stone and tile floors. **Stone Clad** has excellent adhesion to these hard, porous surfaces and shows good water resistance. It provides great initial gloss which can be maintained with a buffing program and **Stone Clad** is easily strippable.

DIRECTIONS

Preparation

Vacuum all surfaces. Clean new surfaces with *NeutraMax* at 2 oz/US gallon (16 ml/L) (1:64) and rinse. Strip previously coated surfaces with *Burlesque*. Rinse well and allow to dry completely.

Application

Apply 2-4 coats of **Stone Clad** with a clean mop and bucket. Saturate mop and press firmly against wringer to remove excess. Allow 35-45 minutes between each coat. Apply additional coats (up to 4 maximum) to achieve desired gloss within a 24 hour period. This coating can be buffed after 48 hours.

Maintenance

Dust mop or vacuum floor. Damp mop with *NeutraMax* at 1 oz/US gal (8 ml/L) (1:128) as needed to keep clean. Buff as needed to maintain gloss. Care must be taken due to the unevenness of stone floors.
